I think the cause is a mix of a too thick outline(maybe i'm wrong but i didn't see often pixel art with thick outline) + sort of pillow effect

This release snuck up on me big time. Isaac was one of those games I got for like \$2 in a sale so I'm more than happy to get this day one. Excite.

Unless I'm missing something, even the Emperor wouldn't help that much, except by giving you another shot at it from the start ?

Emperor teleports you to the boss room. So you would be able to skip 10+ rooms of other bosses and respawning red shits. It's not an auto win by any stretch as I've heard the chest end fight will be different, but it will sure help.

This is probably my most hyped game of the year. The original consumed 200+ hours of my gaming time, the only reason I stopped playing it recently was so that I had a hunger for Rebirth.

The fact that I'll be able to play this on the Vita too? If you'd have told me 3 years ago that I would be playing Bol on the Vita I'd have punched you in the mouth for telling such a beautiful lie.

Can't wait for the new racing league with Rebirth.

It looks kind of funny. I liked how you could switch between filter and no filter quickly on Wii U.

Still pixels for life.

it's intentional, Velocity 2X went gold a full month ahead of time, waiting for the PS+ update date to release

Well the problem is "weird filter" isn't an art style--handmade pixels, hand made 3D models, hand made Flash vectors can all look great. A gross filter distorting handmade work will never look good. (obviously antialiasing on 3D is a bit different)

That lighting is only wrong assuming we think the light source in Isaac is on an angle like that.

However, we know from the Isaac opening and ending cut scenes that he has fallen into his toy chest, therefore, the light should be coming from directly on top of him, which suggests the current lighting makes sense.

I agree, completely. Edmund included the flash filter as a joke because of how many people were upset about the change in art direction. When the filter was announced, a lot of people said they were happy about it and will be using it exclusively.

I love the pixel art, but I've also never had a problem with any games using pixels.

I actually prefer the look of the Flash game, though I'm quite aware of all the performance problems it has due to flash. But I'll definitely go pure pixel over fake flash. Hell, I've played plenty of the Flash version anyway so I'd probably play pixel for the most part even if given a proper choice.

Controller is going to be SO GOOD. No controller is probably my least favorite problem due to flash, even worse than the performance (and joy to key is awkward).

I haven't been this hyped for a game since... jeez... I can't even recall. Probably Super Mario Galaxy?

It's one of the few times in my life I'm actually counting down hours till it releases. Though I own a steam copy (in case I ever drop PS+), I'll probably be played on PS4 since my friends all play exclusively on there.

I'm also excited to play co-op with my girlfriend. She couldn't get into the original because we'd have to take turns playing and the games can go 5 to 45 minutes depending on the run.

Quick note, if you don't care about spoilers: The devs will be streaming 5-7 PM PST tonight. Here are the details:

I just restarted over and over until the first 2 levels gave me OP items (Epic Fetus + Flying, for instance).

Even so, it still took awhile. No damage is tricky, especially once you get down to the Caves.

I will be primarily playing on my Vita/streaming on my PS4 but I did buy the PC version both to show support for the game, and to play it a day early while I wait for my preferred version.

Yes and no, i understand that the source of light comes directly on top of him, but the current shading as is makes the character to look totally flat, while the character is completely round. I hope to not result arrogant(i'm not even a pixel artist :() but i made this quick and dirty job that makes the character to look rounder.

The first one uses the same light source, the second uses a more realistic one and the other two are the original ones. I also reduced the outline just to see how it looks.

I prefer the thinner outline but otherwise I prefer the ingame version. I don't really think it's supposed to be "lit" in any realistic way. He looks weird with both pillow and realistic thicker shading.

Jesus Jones! Spoiler alert!

I'd guess that they wanted to make it less confusing since most of the time, Isaac's face will be obscured in some manner by his items.

Anyone else having trouble pre-loading? It says the content is still encrypted when I try to view the pre-load information. Not a big deal considering the size of the game.

Edit: Never mind, just started for some reason.

It's supposed to be a modern version of the story of god asking Abraham to kill his son. Edmund has said that the trailer is probably more offensive than anything in his game (depending on your temperament).

From a Christian perspective, it seems like most games should be fairly offensive given the amount of killing you do. Call of Duty and Final Fantasy has very little "turn the other cheek/love thy brother" themes. Binding of Isaac just directly reference religion in a way that can be very offensive on the face of it. You have the opportunity to make a deal with the devil (offensive), but if you turn it down, you have a better chance of getting help from god (less offensive).

This game takes place in the imagination of a child escaping an abusive household and how his experience with religion warped his view of faith, sex, and death. It's not that everyone has this experience, because the game isn't even that critical of religion. This becomes more apparent as you progress through the game.

I'd recommend it. It's grotesque at times, but if you've ever killed a civilian on purpose in a video game (like skyrim), you've probably committed a worse digital sin than if you played isaac.

I don't, but I've read that it's not needed to unlock it, at least not for most people.

Edit: I mean unlock the achievement, not the last 'secret'. I'll get the last secret eventually if it is indeed the 200 mom kills, but I really hope that's not needed for platinum.

This is correct. 200 mom kills are not necessary to platinum god. If you want to 100% the game and see all the title screens, then you will have to do that, but if you are just looking to get all achievements and get the platinum god title screen, killing mom 200 times is not necessary.

I had the same problem. I think I ended up having to manually trigger it or something. There was some little utility program I think that went through your re-triggered your in-game achievements and that caused it to finally pop on Steam.

I don't think there is anything directly offensive in the game. Edmund's parents are both deeply religious and they love the game reportedly due to the Christian references.

Thanks Holdfing, Michanical, and BigAT for your help, I managed to fix it. Similar to what BigAT said, I had to manually trigger a secret that refused to unlock. It's a broken one that can't be unlocked in game, called Conquest Horseman. I edited my save file, unlocked that secret and the achievement popped up. #264

That would be an absurd amount of mom kills.

From a Christian perspective, it seems like most games should be fairly offensive given the amount of killing you do. Call of Duty and Final Fantasy has very little "turn the other cheek/love thy brother" themes. Binding of Isaac just directly reference religion in a way that can be very offensive on the face of it. You have the opportunity to make a deal with the devil (offensive), but if you turn it down, you have a better chance of getting help from god (less offensive).

This game takes place in the imagination of a child escaping an abusive household and how his experience with religion warped his view of faith, sex, and death. It's not that everyone has

this experience, because the game isn't even that critical of religion. This becomes more apparent as you progress through the game.

I'd recommend it. It's grotesque at times, but if you've ever killed a civilian on purpose in a video game (like skyrim), you've probably committed a worse digital sin than if you played isaac.

Thanks for the replies guys.

It's a broken one that can't be unlocked in game, called Conquest Horseman. I edited my save file, unlocked that secret and the achievement popped up.

I'm now officially ready for tomorrow.

No problem. Congratulations and welcome to the club.

I love the first game and logged countless hours on it, but... I can't help but feel the freaky as fuck marketing strategy they're using here will probably turn more people off than it attracts.

If you mean the few Live action adverts (which are amazing BTW) I dont see any marketing strategy either.

I remember getting all the achievements for that game, blew though it in what seemed like a month, but was really worn out on the game by then. Are pc gamers getting this game at midnight? If so I gotta get in this.

Meh tomorrow at 10 pst, might as well wait for psn to update.

What I find amazing is that Sony was willing to take a risk on this game that is, on the face of it, very offensive. It's one thing to sell it, as sony can say "we are against censorship!" What's awesome is that by adding it to the PS+ free library, people can almost see it as an endorsement of it.

I'm interested to see what the reviews for isaac look like, as well as what people who have never even heard of Isaac think the first time they boot it up. Most people seem to at least try all their ps+ games every month, and this is a pretty weird one. :D

I find the game itself really repulsive, so I don't know why you would sugarcoat it. I'm really looking forward to it despite that, btw. I just don't usually enjoy constant feces and aborted children on my screen.(not the same as finding it offensive, either)

Game's been teased on Wii U, Xbox One and 3DS now. I'm going to assume that Sony has some timed exclusivity going on.

The Xbox one controller works with the pc, but after what happened to Edmund last time he worked with Microsoft, I'm not sure if that will happen.

Xbox logo in the top right corner in the screen is from after re-entering the game from the home screen.

Honestly, this game is going to be everywhere, and it's going to be glorious.

Edit: They are showing 3 player coop right now.

Could be worse. I'm waiting for the Vita version, so I have no idea when it'll be available.

Can't wait for portable Isaac. It could very well end up being my most-played game on the system.
